Founded in 2002, we combine strong heritage and expertise in natural stone with fresh approach and innovative thinking.

Having been born out of a strong marble background, we have been blessed to have natural stone, respect of nature, listen to you and your needs, care for sunlight and have wisdom to deliver results with quality and commitment. Our simplicity to provide you with lower maintenance, profound knowledge, state-of-the-art machinery and Specialised human capital are our secretaries for successful results.

Limestone is sedimentary rock consisting mostly of organic material such as skeletons and shells of marine creatures and sediments. It is formed by material which settles to the bottom of bodies of water and over millions of years, collects (lithified) into solid rock. It is a great material for bathrooms and fireplace surrounds because of the warm rich look it provides.
